

Appendix D. THE SAN BERNARDINO NATIONAL FOREST LAND AND RESOURCE MANAGEMENT PLAN (LRMP) and THE FOREST PLAN REVISION FOR THE SAN BERNARDINO NATIONAL FOREST

The Monument Plan will be tiered to the San Bernardino National Forest LRMP Revision. All actions approved in the Monument Plan must be in conformance with the LRMP. The LRMP establishes land use zones similar to a city's General Plan. The National Monument Management Monument Plan will be a strategic and operational plan from a Forest Service perspective. Monument land use allocation alternatives were discussed at public meetings held in conjunction with the overall Forest Planning Process.

Because the San Bernardino National Forest LRMP Revision will not be completed at the time of publication of the National Monument Plan, actions occurring on National Forest Service lands within the Monument must be consistent with the existing land use plan published in 1989. The following list outlines the management actions that the National Monument plan tiers to.

The fourteen issues addressed in the EIS are:

- Chaparral and related vegetation
- Fire management
- Fuelwood
- Land use coordination
- Minerals
- Range
- Recreation
- Riparian habitat
- Special areas
- Transportation
- Visual quality
- Water quality and quantity
- Wilderness allocations
- Wildlife and fish habitat
